

2pi Software hosts Australian Ambassador to Sweden, Jonathan Kenna

Friday, 13 September 2019, 2pi Software was honoured by a visit of Jonathan Kenna. Mr Kenna is senior officer with the Department of Foreign Affairs and Trade (DFAT), currently serving as Australia's Ambassador to Sweden.

Discussing topics ranging from gender diversity in tech to technology applications for aged care, Liam O'Duibhir, Carsten Eckelmann and Isaac Lynnah enjoyed a meaningful exchange of ideas.

Mr Kenna shared thoughtful observations of how Sweden's corporate culture drives collaborative innovation. We discussed how agile software development

has matured over the decades to allow small teams the ability to launch big projects through iteration.

Liam and Isaac were able to discuss 2pi Educate and our community initiatives aimed at helping Bega Valley and regional youth enter exciting new tech fields.

All-in-all, it was a very enjoyable and productive meeting. We at 2pi Software are honoured by Mr Kenna's visit and would like to thank him for his service to Australia and our international community.
