

# Skillbot: The life skills app helping young people

Hot on the heels of Safe Around Me, 2pi Software has launched a another popular mobile phone app.

The Skillbot App was developed by 2pi Software and Bega Valley Youth Homeless case worker, Kylie Furnell to assist young people transitioning to independent living and help with some of the common, and sometimes unusual, queries they have.

“Situations that most adults take for granted, need to be learned, such as how to fill in a rental lease agreement. Young people don’t always have someone to teach them these things.” said Ms Furnell according to the [Merimbula News Weekly](#).

The Skillbot App is available for download for both [Android](#) and [iOS](#) devices.
